# HANGING SIGNS Hanging of Signs in McCormick Place Procedures and Rules

#### 2018 AACC CLINICAL LAB EXPO / JULY 31 - AUGUST 2, 2018

Hanging of signs, both electrical and non-electrical, is permitted in McCormick Place facilities with permission, under the following conditions and limitations. These conditions have been reviewed and provide absolute limits which cannot be exceeded under any conditions.

- 1. The top of the sign may not exceed the height limitation specific to your booth type and building. Please refer to the General Information Bulletin to determine your height limitation.
- 2. All hanging signs must be sent to the Freeman warehouse, 2500 West 35th Street, Chicago, IL 60632, and be received by JULY 18, 2018.
- 3. The weight of signs or materials is not to exceed 250 lbs. per hanging point. Any sign weighing in excess of 500 lbs. will require a "structural integrity" form.
- 4. All signs, regardless of size, should be constructed of lightweight metals and plastics to allow greater flexibility and ease of installation.
- 5. The placement of all "hanging signs" shall be determined by Freeman prior to installation to insure minimum stress to the supporting framework.
- 6. No signs are to be hung from any electrical fixtures, raceways, any water, gas, air, fire protection piping, supports or hangers.
- 7. All electrical and neon signs must conform to electrical codes of the City of Chicago.
- 8. Freeman is responsible for all hanging signs. Freeman will pre-assemble all signs. No display house will be allowed to assemble or disassemble any hanging sign.
- 9. Set-up instructions must be included with the Order Form and with sign crates.
- 10. Because of the structure of the ceiling, and the location of exhibits, in relation to support beams, your sign may have to be moved from your original specifications.
- 11. Exhibitor personnel or your display house may supervise on your behalf. Exhibitors who do NOT provide supervision (either company personnel or display house) agree to accept the charges for time, materials and equipment as determined by Freeman and/or the Electrical Contractor.
- 12. YOU ARE REQUIRED TO MAKE ALL ARRANGEMENTS PRIOR TO MOVE-OUT FOR THE OUTBOUND DISMANTLING, PACKING AND SHIPPING OF YOUR HANGING SIGN. FREEMAN CANNOT BE HELD LIABLE FOR DAMAGES OR MISPLACEMENT OF SIGN(S) SHOULD OUTBOUND DISMANTLING ARRANGMENTS NOT BE MADE. ALL PERTINENT INFORMATION AND ARRANGEMENTS MUST BE GIVEN TO THE FREEMAN SERVICE CENTER IN EACH FACILITY.

## HANGING SIGN PLACEMENT DIAGRAM

The grid below may be printed to layout the placement of your Hanging Sign. Please complete as clearly as possible, indicating the following:

- 1. Booth orientation: Please provide surrounding aisle and/or booth numbers, particularly for island booths. Also, please try to orient your booth to the overall floor plan so that the diagram does not have to be rotated.
- Use diagram below to represent your booth space. Indicate how far in from each boundary you would like your sign placed.
- The ceiling structure and relation to the support beams may require your sign to be moved from your specified location.
