

Suzanne Barber

Director of the Center for Identity, The University of Texas at Austin

Dr. Suzanne Barber is the AT&T Endowed Professor in Engineering and Director of [The Center for Identity](#) at The University of Texas. The mission of the Center is to deliver high-quality discoveries, applications, education and outreach in identity management, privacy and security. Dr. Barber has authored over 300 peer-reviewed publications in the areas of cyber-trust, cyber-security, agent-based systems, and software engineering. Her research has been supported by the Defense Advanced Research Projects Agency, National Science Foundation, Office of Naval Research, National Cancer Institute, U.S. Congress, the State of Texas, and numerous corporate organizations. Dr. Barber has invented and commercialized core technologies that deliver new levels of visibility, knowledge discovery and collaboration among distributed stakeholders, as well as trusted online transactions. Dr. Barber currently serves as a member of the U.S. Department of Homeland Security's (DHS) Data Privacy and Integrity Advisory Committee, appointed by the Secretary of Homeland Security, offering guidance to the DHS Chief Privacy Officer. Formerly, Dr. Barber served as Director of Software Engineering at The University of Texas at Austin.
